

PUBLIC TRANSPARENCY REPORT

2024

Tradeka Corporation

Generated 25-11-2024

About this report

PRI reporting is the largest global reporting project on responsible investment. It was developed with investors, for investors.

PRI signatories are required to report publicly on their responsible investment activities each year. In turn, they receive a number of outputs, including a public and private Transparency Report.

The public Transparency Reports, which are produced using signatories' reported information, provide accountability and support signatories to have internal discussions about their practices and to discuss these with their clients, beneficiaries, and other stakeholders.

This public Transparency Report is an export of the signatory's responses to the PRI Reporting Framework during the 2024 reporting period. It includes the signatory's responses to core indicators, as well as responses to plus indicators that the signatory has agreed to make public.

In response to signatory feedback, the PRI has not summarised signatories' responses – the information in this document is presented exactly as it was reported.

For each of the indicators in this document, all options selected by the signatory are presented, including links and qualitative responses. In some indicators, all applicable options are included for additional context.

Disclaimers

Legal Context

PRI recognises that the laws and regulations to which signatories are subject differ by jurisdiction. We do not seek or require any signatory to take an action that is not in compliance with applicable laws. All signatory responses should therefore be understood to be subject to and informed by the legal and regulatory context in which the signatory operates.

Responsible investment definitions

Within the PRI Reporting Framework Glossary, we provide definitions for key terms to guide reporting on responsible investment practices in the Reporting Framework. These definitions may differ from those used or proposed by other authorities and regulatory bodies due to evolving industry perspectives and changing legislative landscapes. Users of this report should be aware of these variations, as they may impact interpretations of the information provided.

Data accuracy

This document presents information reported directly by signatories in the 2024 reporting cycle. This information has not been audited by the PRI or any other party acting on its behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented. The PRI has taken reasonable action to ensure that data submitted by signatories in the reporting tool is reflected in their official PRI reports accurately. However, it is possible that small data inaccuracies and/or gaps remain, and the PRI shall not be responsible or liable for such inaccuracies and gaps.

Section 1. Our commitment

- Why does your organisation engage in responsible investment?
- What is your organisation's overall approach to responsible investment, and what major responsible investment commitment(s) have you made?

Responsibility has been a key element in all Tradeka's operation through out its history. Responsible investment is Tradeka's way to help shape the society at large. At the same time responsible investing is a combination of risk management and selection of progressive investment opportunities. Tradeka is committed to improving and deepening its RI activities both internally and in co-operation with its asset managers.

Tradeka-sijoitus is an active investor with a long-term outlook. The company applies environmental (E), social (S) and governance (G) aspects to its ownership policies, investment analyses and investment decisions, in both direct investments and in its cooperation with asset managers.

Tradeka is founding member of FINSIF, Tradeka has signed and committed to the UN Principles for Responsible Investment (PRI), refraining from

making investments in countries in EU's list of non cooperative jurisdictions for tax purposes or in other countries the company deems as tax havens.

Tradeka takes part in UN's Global Compact protocol.

Section 2. Annual overview

- Discuss your organisation's progress during the reporting year on the responsible investment issue you consider most relevant or material to your organisation or its assets.
- Reflect on your performance with respect to your organisation's responsible investment objectives and targets during the reporting year. Details might include, for example, outlining your single most important achievement or describing your general progress on topics such as the following (where applicable):
 - refinement of ESG analysis and incorporation
 - stewardship activities with investees and/or with policymakers
 - collaborative engagements
 - attainment of responsible investment certifications and/or awards

Tradeka continued executing previously agreed actions in its Climate Policy. We improved and widened our ESG questionnaire for our asset managers to cover all our managers in all asset classes we invest in. The survey provided a detailed picture of fund management companies' genuine contributions to responsible investment.

We made progress in our carbon footprint targets as we reached set targets in 2020 in four years in advance. EU taxonomy reporting by classifying our liquid asset fund holdings by Articles 6,8 and 9. We continues to publish yearly Responsible Investment report, where we described our 2023 activities. In the report we published even more information than before, in addition to the carbon intensity, Scope 1 and Scope 2 carbon emissions within the SFDR framework regulation. Emission figures have been calculated for Tradeka-sijoitus' liquid stock and fixed income investments starting 2022. We started publishing our direct holdings in green/sustainability linked bonds.

We have re-newed our Ownership Policy Document stating our aspirations to take larger role in AGMs.

The ESG ratings of liquid stock and fixed income investments received the Leader rating on the MSCI ESG Research scale, which as a whole was a very welcome continuation of our focus on progressive investment vehicles.

Started to follow and publicly report labeled bonds on the fixed income side for direct holdings.

Section 3. Next steps

- What specific steps has your organisation outlined to advance your commitment to responsible investment in the next two years?

In the 2024 investment plan, the implementation of set goals continues specifically in terms of the

composition of our portfolio, reporting, and acquisition of new sustainable assets, such as green and sustainability linkedbonds. However, we are now in a position to invest also in mutual funds that invest in transition companies i.e. corporations which are on a path to change from being 'brownish' to green.

We will engage in active dialogue on reporting and its development with the fund management companies

we use for long-term investments. We will also amend the ESG survey by including more details on issues

important to Tradeka-sijoitus.

Important step for year 2024 is to analyze all our liquid holdings based on their commitment on SBTi-targets. We'll start publishing these findings based on year end 2024.

We also have decided to start reporting biodiversity issues related to our liquid holdings. Those findings will be reported based on year end 2025

We value highly UN PRI Reporting as a tool to further improve our operation. We are looking for ways to receive better grades relative to confidence building measures by starting to have our auditors* report on the information published in RI reports.

We are in the process of evaluating the effects of the changed geopolitical landscape both from the viewpoint of security selection and ESG/RI aspects. Another important aspect is to study the changing composition of widely accepted benchmarks towards less carbon intensive weightings. At the end of these processes we will probably revisit and renew our strategic allocation benchmarks, at least partly.

We take stewardship action in our direct active equity portfolio and in direct fixed income if needed. We have updated Ownership Policy Document for more active engagement especially issues related to AGM. Other stewardship actions are taken towards our asset managers who in turn are responsible for contacts to the companies we are invested in. In passive investment we focus on selecting relevant benchmark (with e.g. exclusions) instead of activity in AGM

Has your organisation identified climate-related risks and opportunities affecting your investments?

(A) Yes, within our standard planning horizon

Specify the risks and opportunities identified and your relevant standard planning horizon:

Risks are related within our invested companies being affected e.g. changing regulation or environmental issues like carbon footprint
 Opportunities are located in cases where e.g. regulation or environmental issues increase the sphere of business activities and also profitability. We are paying more attention in transition companies who are on a credible path on becoming more ESG compliant.
